ACMT™ Advanced Climate Management Technology is FXR's proprietary collection of dry mesh venting, dual-layered HydrX Pro™ laminates and seam sealed linings, creating a Dual Layer Moisture Shield. This elite combination dramatically improves an outerwear garment's ability to maintain waterproofness, breathability, reduce condensation, and manage the inner micro-climate zone between the body and the garment by creating a dual moisture shield against the damp and cold. FXR's ACMT™ HydrX Pro™ combination is guaranteed to keep you dry, warm and comfortable during high intensity rides.

HydrX™ is FXR's exclusive Single Layer Moisture Shield that is applied to the outer shell of FXR products. HydrX™ is applied as a single layer laminate in mid-level FXR garments and a single layer coating in entry level FXR garments

F.A.S.T. insulation is made from an expanded, low-density polyethylene foam membrane that offers buoyancy assistance for up to two hours. The floatation membrane construction has excellent insulation properties, even when wet, which is integral should you be submerged. The F.A.S.T. membrane is also moisture resistant and lightweight, which allows the user to retain excellent warmth and mobility. IMPORTANT – FXR jacket and pants with F.A.S.T. must be worn together as a suit to achieve buoyancy properties. Additionally, F.A.S.T. items will be rendered ineffective in adverse conditions such as strong water currents. F.A.S.T. equipped products provide exceptional mobility, warmth, style, and attention to detail while offering buoyancy properties, but are NOT COAST GUARD APPROVED.

FXR's Thermal Flex™ insulation is a powerful blend of polyester fiber fill that provides exceptional warmth and flexibility at any temperature. Unlike other fiber fills, which often become stiff in cold weather, our Thermal Flex™ insulation provides superior comfort, mobility and warmth season after season, wet or dry. Our trade-marked insulation is used in both fixed and removable liner systems, in both jackets and pants meaning all of our products come with unbeatable heat retention abilities.

Omni Stretch™ shell material provides maximum stretch and mobility, while allowing the shell material to take impacts from trees and rocks, with minimal chance of snagging or tearing. Omni Stretch™ is extremely durable and provides the greatest amount of stretch in a rugged shell material in the industry. Available in select premium FXR Jackets, Pants and Monosuits.

Key to the overall comfort, warmth, and breathability of the garment. Remains flexible at any temperature. Allows for maximum breathability through moisture-wicking mesh layers & Thermal Flex Insulation.

Provides protection from the elements like a monosuit with the higher inseam and mobile fit of a two piece. Extremely versatile for both short and tall riders alike and allows increased mobility and proper fit. When both pieces are attached, the Dri Link™ allows increased warmth for colder days while removing the Dri Link™ on warmer days provides maximum cooling and air exchange.

The new Dry Vent™ System is a high performance venting system that maximizes ventilation in radial side body vents and the chest of FXR jackets and the inner and outer thigh of FXR pants. Seam sealed venting mesh eliminates snow ingestion in all snow conditions, including bottomless powder or wet snow. It uses the cold air entering the vents to exhaust the warm air built within the inner microclimate between your jacket/ pant and base layers. FXR's trademarked Dry Vent™ System is 99% more effective at controlling your core temperature and keeping you dry than any waterproof/ breathable system on the planet.

Jackets/Pants = Indicates a durable 4-way stretch nylon/spandex shell with HydrX Pro™ Softshells/Trilaminates = Indicates a durable 4-way stretch Active fit trilaminate shell

EXKIN® PLATINUM® is the ultimate technology for increasing warmth. Exkin® Platinum® thermal technology maintains warmth, prevents heat loss and retains insulating properties even when wet. Lightweight construction does not compromise mobility by adding bulk. Added to the back and chest of FXR products, it adds warmth to places that lose the most from being exposed to the wind.

COLD INSULATED RATING ICONS

1

UNINSULATED

MILD WEATHER / AGGRESSIVE RIDING GEAR

A value of 1 has no thermal insulation and is suitable for mild climates or situations where intensive perspiration occurs.

10

INSULATED

COLD WEATHER / LOW ACTIVITY RIDING GEAR

Values between 7-10 have extremely high thermal properties and are able to withstand extreme temperatures, well below -40°C/F and will keep you warm during sedentary outdoor activities.

10

INSULATED
COMBO

SHELL & FIXED LINING COMBINED INSULATION RATING

If the item is a 2-in-1 or 3-in-1 (indicating it has a removable liner), both the "SHELL" and "COMBO" (combined) value of the shell and liner will be displayed.

Youth		6 3/4	7	7 1/4				
Child		5 1/2	6	6 1/2				

Measured from base of wrist to top of middle finger.

HOW TO MEASURE

For the best results, have another person take measurements, while wearing light clothing. Tape measure should be snug, but not tight.

- 1. Chest Measure under arms around fullest part of chest
- 2. Waist Measure around natural waist line
- 3. Hip Measure around fullest part of lower hip with feet together
- 4. Inseam Measure from crotch down inside of leg to floor (without shoes)
- 5. Sleeve Measure from center back of neck, across shoulder, down length of arm to wrist bone
- 6. Gloves/Mitts Measure from wrist to top of middle finger
